

NEW! MULTIFLOWERING TULIPS

Too much cannot be said about this amazing new class of tulips. Instead of producing the conventional single stem with one bloom on top, these new Multiflowering Tulips grow a strong main stem with from four to six branches half way up the stem, each side shoot or branch carrying its own delightful flower. The result is that four to six, or sometimes eight flowers are obtained from one bulb on one stem. Although these new Tulips are a bit smaller than the conventional kind, they are still of good size. These exquisite blooms are gracefully spaced and as you can well imagine, produce an unusual and great mass of color. We are sure that you will be greatly pleased with the results.

NEW GOLDEN DUCAT

Here is a brilliant, new, Gold Medal Daffodil that will light up your garden with its exquisite form and color. F.C.C., R.H.S. and Haarlem, this sport of the well-known daffodil King Alfred is a fine double variety that displays its loveliness early. Several layers of lovely wax-like petals overlap one another and gradually form a very symmetrical double center. The larger segments are canary-yellow and the smaller segments, interspersed between the larger, are aureolin yellow. The very large flower is carried on a strong tall stem. This early bloomer is an outstanding exhibition variety. In addition to its outstanding color and form the longlasting flower is of especially good substance. Golden Ducat is a winner all the way.
